

# MITSUBISHI TRITON HI-PERFORMANCE INTERCOOLER KIT

Turn your Mitsubishi Triton into a real workhorse with PWR's fully engineered intercooler kit and race-winning expertise. Unleash your 4x4's full potential and transform your working week.

**TRITON INTERCOOLER KIT**  
**424 Nm** TORQUE **113.9 kW**  
AT ALL 4 WHEELS WHEN COMBINED WITH TUNING

PWR - USED BY THE WORLD'S WINNING TEAMS  
🏆 Formula 1 - NASCAR - V8 Supercar

# Where could you take your Mitsubishi Triton if it had more torque?

If you're the kind of person interested in getting the most out of your Triton, then PWR have developed an intercooler kit for you. PWR have the ultimate solution to help you push harder in any situation.

**POWER INCREASE 20↑↑↑ KW WITH TUNE**

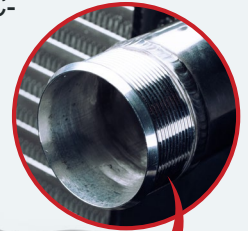

**25% MORE TORQUE WHEN TUNED AT ALL 4 WHEELS**

**EXTRUDED HI-FLOW TUBE FOR REDUCED PRESSURE DROP & INCREASED EFFICIENCY**

**53% LESS CHARGE AIR PRESSURE DROP | 140%↑↑ OF OEM FACE AREA**

PWR's intercooler and pipe kit is specially engineered and made in Australia to boost Mitsubishi Triton's torque, power and fuel economy.

By combining the most efficiently-designed and manufactured pipe kit with our intercooler. PWR have solved the problem of factory hose expansion under pressure. PWR pipe kits are mandrel-bent, hard aluminium piping with high-quality 5 ply silicone joins. PWR's signature CNC-machined ribbed outlets and the use of premium stainless steel constant tension Murray clamps prevent the hose from blowing off under boost conditions.

RIBBED BILLET OUTLET PREVENTS HOSE BLOW-OFF.

**TIG WELDED BLACK COATED OPTION SHOWN**

STANDARD FINISH: POLISHED STEEL. COATED BLACK IS AN OPTIONAL EXTRA.

## PASSIONATE ABOUT PERFORMANCE

What do 90% of Formula 1 teams and all NASCAR and V8 Supercar teams have in common? They use PWR cooling systems.

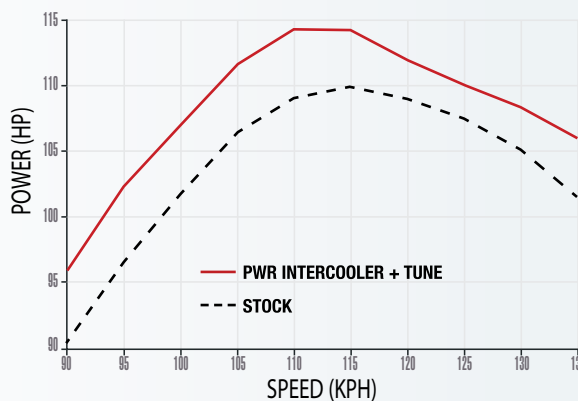

We design, manufacture and test everything in-house here on the Gold Coast, so we can provide you with the ultimate solution to any performance problem.

The PWR intercooler has a thicker core and increased core surface area than the OEM. PWR's 55mm square-face, high-flow extruded tube is designed for less pressure drop and improved efficiency.

When combined with a tune, the PWR kit achieved figures of 424Nm torque and 113.9kW power at all four wheels. **That's almost a 22% increase in power and a 25% increase in torque.**

Order your kit today! Call PWR on (07) 5547 1600.

**AUSTRALIAN MANUFACTURING QUALITY & SERVICE**
